Jumbled traffic	Getting stuck in traffic is the absolute worst,
Students jumbled in hallways during passing period	and the same can be said about getting through the hallways here at school—especially with only a five-minute passing period.
Good traffic flow	To keep things flowing smoothly, then, think about common traffic patterns and practices:
Animation of 2x2	Walk two by two (that means two people by two people on either side of the hallway), which allows a safe passing area for anyone who might be moving more quickly than you and your friends.
Headshot	And to stay moving quickly, walk at a moderate pace (think of the tempo of FAMILIAR SONG)
zombies lurching	—not some slow-moving zombie lurch.
Students modeling 2x2 + walk & talk	And talk while you walk. As masters of multitasking, this should be really easy for us.
Headshot w/ air bullet points of hashtags	By implementing the practices of both walk and talk and two by two, everyone can get where they need to be, when they need to be there—quickly <i>and</i> safely.
Buffalo w/ overlay of hashtags	Stay safe out there, Buffs.
